

We Are Water

We are water seeping from the rocks,
slowly trickling, sparkling in the sun.

We are mountain springs
clear fresh hope for renewed life,
pristine purity drink deeply.
God lives where the springs are.

We are sea
power and richness, food for the soul.
We are waterfalls plummeting into eternity.

We are born of water.
The world is water
constantly reshaped by the vessels it fills.

We are your vessels
fluent, transforming, life giving water
Gift from the Sea of Love.

We take your water into our frail hands,
Let it soothe our spirit as it flows back to you
And beneath the sprays of your redeeming grace
We are all made whole.

Virginia Skrdlant, SHCJ
