

The Impact of YOU

“Do not neglect to do good and to share what you have; God is pleased by sacrifices of that kind.” —Hebrews 13:16

Replacement Resident Monitoring System

The Pascucci Family Our Lady of Peace Residence (OLP)

STATEMENT OF NEED:

- The original manufacturer of OLP's monitoring system will no longer support the system.
- IHM leadership conducted extensive research that led to the determination that a replacement resident monitoring system is needed at OLP.
- Thorough review of options and vendors' proposals took place.
- Resident sisters need to be able to move about OLP with confidence and dignity, knowing that wherever they are there will be a rapid response to medical emergencies.

OLP is a 130,000 square foot, patient-centered care facility. Sisters generally frequent four floors, three wings, and a main street (shopping, beauty salon, visiting, etc.). We believe in an environment that encourages active, healthy sisters to be safe at home; therefore, we've chosen Stanley Healthcare Solutions. This ambulatory resident monitoring system gives residents the ability to be mobile, to call for assistance, and to be more independent.

Stanley Healthcare Solutions Project Elements:

EMERGENCY CALL SOFTWARE Provides devices such as pendants to allow Sisters to request help. Also includes bed and chair alarms that provide non-invasive monitoring of fall risk sisters at night. System collects device triggered events and forwards clear messages to digital phones carried by aides and nurses for quick response. System ensures that appropriate staff will respond to a sister wherever she is, and system provides for direct communications between nurses and aides when additional assistance is needed.

HARD-WIRED WANDER PREVENTION SYSTEM Provides various automatic locking and location specific door alarms to prevent residents with cognitive dementia from wandering, allowing them to move around limited parts of the facility with dignity. Safety coverage includes outdoor courtyards.

WIRELESS COMMUNICATIONS SYSTEM This core infrastructure handles the transmission of device alarms and nurse/aide communications.

ELECTRICAL SUPPORT This essential component helps to ensure the system remains operational during power outages.

Financial contributions may be made in the form of cash donation or pledges. To set-up your individual contribution, call or email Sister Ann Monica Bubser, IHM, Director of Development, at **570-346-5431** or **bubsera@sistersofihm.org**.

The IHM Congregation is most grateful for your generosity. We continue to pray for you and those you love.

Contributions to the Sisters of IHM are deductible for income tax purposes as provided by law. The Congregation is a 501(c)(3) organization; Tax ID # 24-0795454.
